Who is Hatibow, and What Has He Done with Our
Beloved Moon?

sagesigma.blogspot.com/2015/04/who-is-hatibow-and-what-has-he-done.html

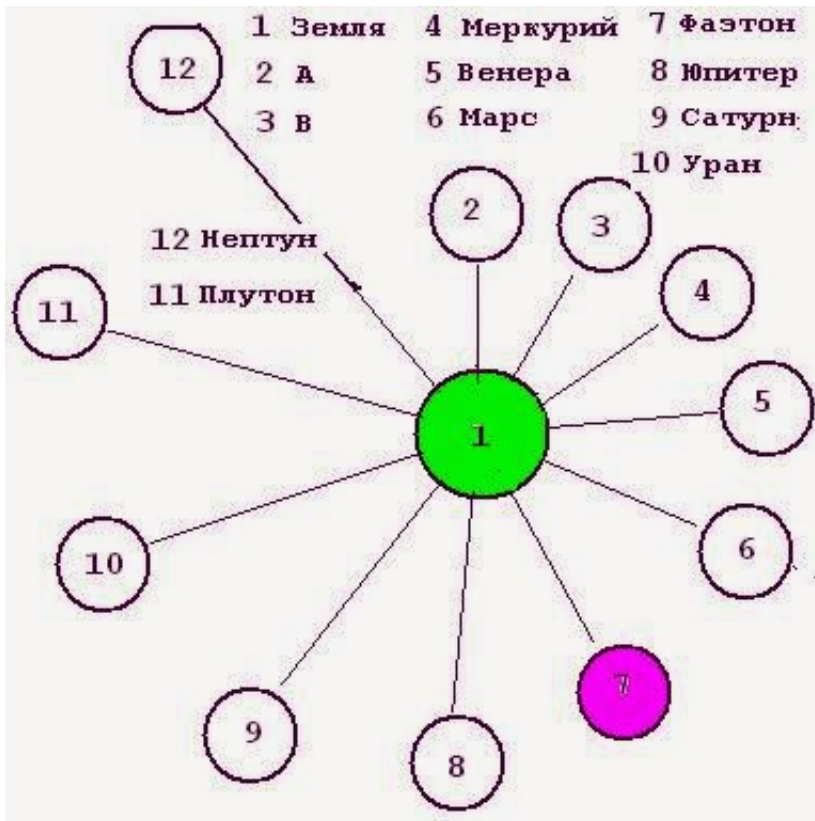

Well, as some of you are likely aware, there is currently a new phenomenon on the fringes of the internet involved with our closest neighbor in outer space. The phenomenon has been deemed by one researcher by the name of Crrow777 as the “lunar wave”.

What is the lunar wave? From what I can tell from YouTube videos, the lunar wave is a ripple that moves across the lunar surface. Imagine a “momentary blip” on some type of projected image that covers the surface of the moon. Crazy, right?

The premise that Crrow has apparently stumbled upon (and other researchers online who point telescopic video

cameras at the moon during evenings) is that there is a “tonal/octave” system in place on the moon that prevents us from seeing what is actually on the surface of the moon that faces Earth. In other words, a type of frequency that has kept the masses on this planet from learning the true nature of our reality. In cinematic metaphors, the moon is truly the moon featured in the “Truman Show.” Crrow and others have caught glimpses of this moon facade with their skywatching endeavors and posted findings online (please take the time to check out some of his videos). I have no idea if the videos are faked or genuine, but they are fascinating to watch.

Crrow’s hypothesizing and commentaries online are always entertaining ; however, where the story truly gets interesting is Crrow’s discovery of an alleged Soviet/Russian scientist by the name of Khatib Alexander who had posted similar research through 2011. Khatib Alexander, or Hatibow per the email listed, has numerous articles published online and converted to english courtesy of Google Translate. Friends, now is the time to head down into the rabbit hole of reality.

The research is difficult to read, but a quick overview of what is going on his research :

There existed a time in humanity's history where the current moon did not exist

In 18337 BC, a convoy of planets infected our solar system (or created our solar system)

The convoy of planets contained a race of alien beings from the Sur 4 star of the big dipper

Earth, having resources and being hospitable, was not able to defend itself from the alien race

The alien race is Spider like in nature; the Spider race was called "Atlanta" and essentially placed their brains into

human bodies

The Sun and Moon then are used to create cycles or frequencies of the Super System, Systems and Sub Systems that dictate life on this planet

UFO naughts are terrestrial in nature and guardians of the these systems of control

Different genotypes of humanity exist, and a specific genotype still carries with it the spider brain

That's about the extent of what I've gathered thus far. As to what is going on, I have absolutely no idea. Hatibow could be a legitimate Soviet researcher exposing truths regarding reality, or he could be a Russian sci fi writer, or this could be some type of governmental disinformation process, or who knows what else. Unfortunately, there isn't much info regarding Hatibow, and he allegedly passed away in 2011. So the speculation will likely always be there.

So, to keep this blog going, I'm going to attempt to wade through his research still posted on line in an attempt to make sense of it all. I hope to be able to publish findings as I go along for everyone's review, critique, and comments.

For everyone's info, to date, you can check out Crrow777's YouTube channel. Crrow has also done two

excellent interviews with Greg Carlwood on “The Higher Side Chats” podcast, as well a great interview on the Grimerica podcast. As for Hatibow’s research online, here is a link :

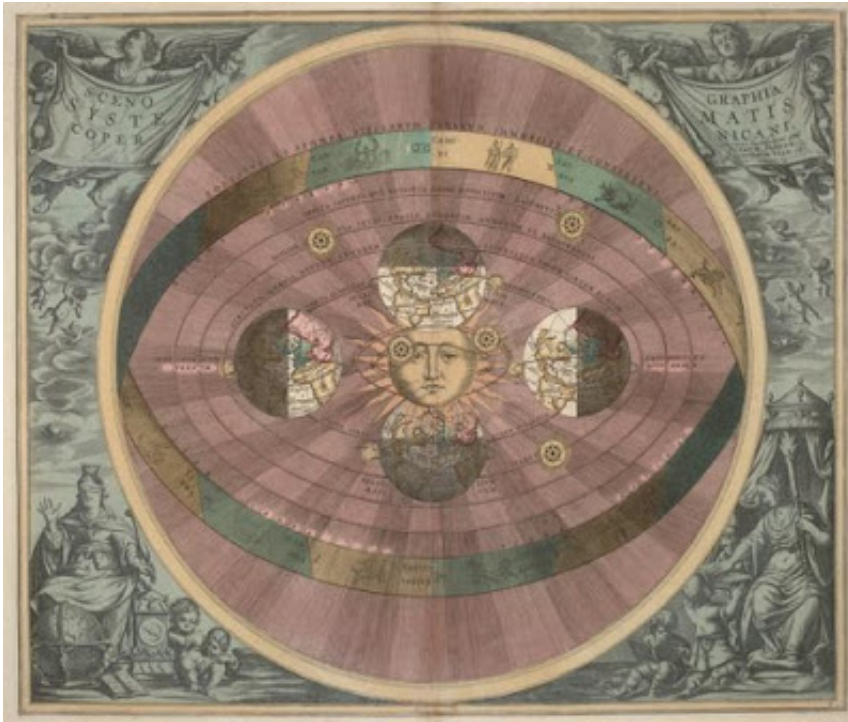

[translate.google.com/translate?
hl=en&sl=ru&u=http://lit.lib.ru/h/hatybow_a_m/lunak.shtml&prev=search](https://translate.google.com/translate?hl=en&sl=ru&u=http://lit.lib.ru/h/hatybow_a_m/lunak.shtml&prev=search)

So with the blood moon approaching on Easter weekend, keep your eyes to the sky and wonder what is ultimately going on around us. Good luck !

Hatibow’s God : The Land Management System

sagesigma.blogspot.com/

sagesigma.blogspot.com/2015/07/hatibows-god-land-management-system.html

Continuing my exploration of the published works of Abdelelah Al-Khatib, aka **A.M. Hatibov**, AKA **Hatibow**, I've begun to piece together the **Hatibow "system"** that creates our world and **creates the infamous Lunar Wave**. To begin with, let's assume the following is true (forgive me, all – there are quite a few bullet points in this one in order to attempt to keep the info straight for you (and me!). This is a long post, and I've tried to make this as readable as possible for everyone.

- Earth is an artificially constructed structure
- Man was imported to Earth 145,762 years ago
- Man, not able to defend itself, was colonized and infected by a Atlanta-ian Spider race from the planet Sur 4

around 18000 BC

- To protect this new found colony and its assets, the Spider race created a system of Land Management to protect their conquests
- The newly installed Land Management System includes a Super System, a System, and a Subsystem

The Super-System, System, and Subsystem

The Super System

The planet Sun (no bigger in size than Earth), the UFO moon, and several other UFO moons

The Sun : A planet that is a “Gravity-magneto-electric generator”

The Moon : A UFO, or artificial construct that houses another group of biological entities and dictates programs to Earth

Only satellite in communication with the planet Sun

Tasks of the Super System

Control Cycle Time

Transfer system programs for implementation

The Sun communicates to the Earth

The Moon communicates to the Earth

Several other satellites communicate to the Earth

The System

The atmosphere and planet Earth

Type I Level : Habitat of all biological structures

$0 < \text{height} < 12,400$ meters

FYI : there are two types of biological structures

Type 1 : All Barabashek type humanoids : ghosts, goblins, and other types that “humanity faces at every turn”

Type 2 : Humanoids from small insects to human beings

Type II Level : The hydro acoustic / hydrophone layer of the Earth

$-2200 < \text{height} < 0$ meters

Essentially the battery of the Earth, wherein 100% of tritium resides, as well as the means to biological sustenance

Type III Level : The Brain of the Earth

$-4400 < \text{height} < -2000$ meters

The layer of Earth that stores the software features and discharges frequencies into the environment of biological structures

Type IV Level : the location of Earth’s Management Structures

$-4400 < \text{height} < -3400$ meters

Complexes, Controls, and UFOs reside in this layer of the Earth

Communication with the Super System takes place at this level with some Complexes (but not all Complexes)

Tasks of the System

Ensure the execution of system programs

Provide permanent control over the implementation of the program

The Subsystem

Part of the control paradigm related to the building blocks of various matter/spirit forms (I think)

I believe this to be Hatibow's paradigm reforming relationship to mass, wherein :

Strictly organized plasma -> material body -> liquid -> gas (more on this later)

Tasks of the Subsystem

Fulfill all the requirements dictated by the Program

Respond / react to any changes that occur during Program execution

How Hatibow's God Communicates

In an attempt to make sense of all of this info, let me try to place this in the context of the definition of a classic communication cycle. For an effective communication cycle to take place, the following items need to be in place :

Sender – Formulates, Encodes, Transmits
Message

Medium

Receiver – Transmits, Encodes, Formulates

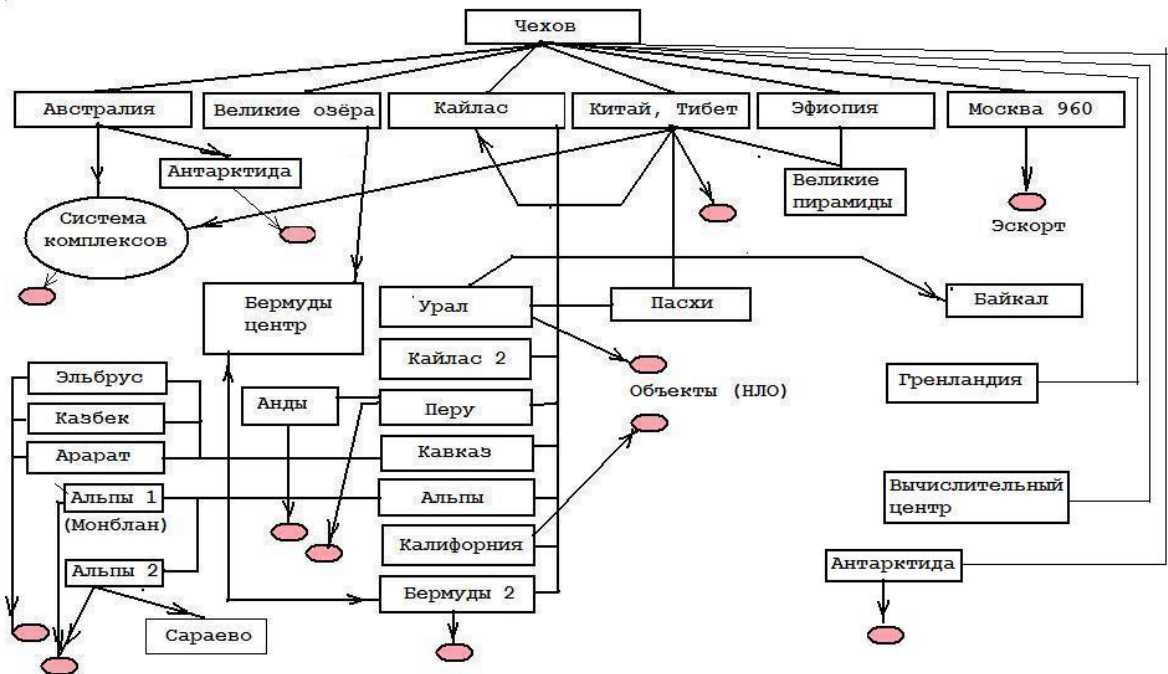

Feedback

God as a Sender

This one I'm still struggling with this one. One could safely assume that the source of the signal that starts with our "god", the 4 meter long Atlantan Spider race hailing from the Sur 4 system. Either the Spider race still exists and uses our biological formations for some unknown need, or the Spider race has transplanted their brains into human biological forms for survival. Either way, at one point, Hatibow states quite eloquently:

"No need to wrestle with how the signal came, and there is no need to create monsters recognition."

.....

“The main **dispatch center** resides in **Chekhov**, near **Moscow**, and is the **main control center**, and **dictates the information/data** to other **complexes**. Depending on where the program is destined to arrive, the message is fed to one or more of the following nine parent complexes:

1. Australia – Maintains and produces changes required of the Earth’s topography
2. Great Lakes – Coordinates and controls all 7909 UFOs on the planet
3. Kailash – Main control system of the “Program” of the atmosphere and genotypes of the world
4. China/Tibet – Main set of controls in the world, and sets standards for all “facilities” (not sure what

is or means)

5. Ethiopia – Main control center to ensure that “tubes” or communication stay open with the satellites of planets

6. Moscow – The main UFO on Earth – all the matrices of brains 42, 44, and 46 are stored here

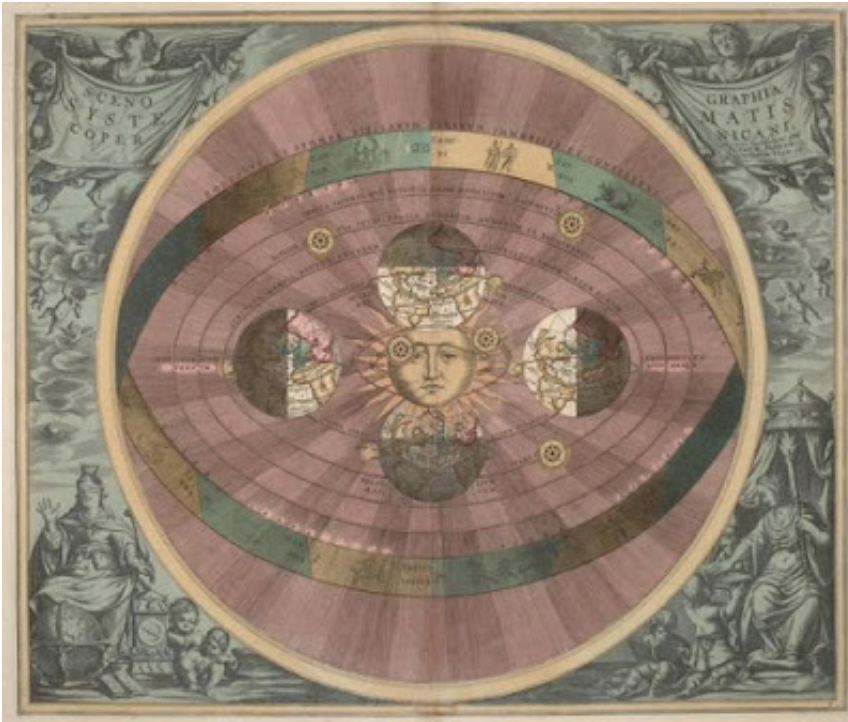

7. Greenland – Manages the brain of the atmosphere/weather

8. Ireland – The computing center of the System

9. Antarctica – synchronizes the shift from Winter to Summer

Hatibow's God : The Land Management System

sagesigma.blogspot.com/2015/07/hatibows-god-land-management-system.html

Continuing my exploration of the published works of Abdelelah Al-Khatib, aka A.M. Hatibov, AKA Hatibow, I've begun to piece together the Hatibow "system" that creates our world and creates the infamous Lunar Wave. To begin with, let's assume the following is true (forgive me, all – there are quite a few bullet points in this one in order to attempt to keep the info straight for you (and me!). Tasks of the Subsystem

Fulfill all the requirements dictated by the Program

Respond / react to any changes that occur during Program execution

How Hatibow's God Communicates

In an attempt to make sense of all of this info, let me try to place this in the context of the definition of a classic communication cycle. For an effective communication cycle to take place, the following items need to be in place :

Sender – Formulates, Encodes, Transmits
Message

Medium

Receiver – Transmits, Encodes, Formulates

Feedback

God as a Sender

This one I'm still struggling with this one. One could safely assume that the source of the signal that starts with our "god", the 4 meter long Atlantan Spider race hailing from the Sur 4 system. Either the Spider race still exists and uses our biological formations for some unknown need, or the Spider race has transplanted their brains into human biological forms for survival. Either way, at one point, Hatibow states quite eloquently:

“No need to wrestle with how the signal came, and there is no need to create monsters recognition.”

Needless to say, this source/sender/God has something that it wants to communicate, whether it be a reset of the Cycle or the transference of programs to Earth for future implementation. Regardless of the origin of the signal, the Super System is the initial source of information/programming. The planet Sun creates the initial message, or "starts" the program through an

electro – magnetic source code tuned into the 128 Octave. I believe this Octave resets everything on Earth; biological structure, brain, or otherwise. More on octaves below...

The Moon's role in the Super System is to maintain a sort of output/reception center of the system, as well as receive programs (though less frequently) from Sur. The Moon apparently receives new information from the Sun, Sur and/or creates in a new program independently (not sure which is accurate) and does one of two things; produces new training programs regarding Earth and resets conditions on Earth. As mentioned before, the Moon is an inhabited UFO, a construct that sends/receives information to the planet Earth. In this sense of the UFO Moon, the lunar wave phenomenon that Crrow777 and others have captured makes some sense. The Moon communicates data to Earth. Hatibow mentions that the magnetic source code is the 84 Octave, and communication to Earth is only possible after the spring equinox, for approximately 3 months. I believe Hatibow states that the window to long distance communication back to the planet Sur occurs every 11.4 years.

I was not able to put any thoughts together regarding other planetary satellites involved in the Super System.

I will ignore this piece of the puzzle for the time being.

God's Message

In Hatibow's paradigm, we have the transference of system programs from our solar system neighbors, the Sun, the Moon, and other Moons. The message ultimately dictates life on our planet, whether it be rain needed in Wisconsin, drought needed in the Sahara Desert, mosquitoes needed in Moscow, or babies needed in the Caucasus Mountains. If the message is a reset to cycle time on Earth, the Sun transmits directly to Earth. If the message is in regard to a requested change on planet Earth, the inhabitants of the Moon either create the message and communicate to planet Earth or relay a program dictated from Sur to the planet Earth.

God's Medium

Whoever creates the "Send" message, there is some inherent intent in the message and the message is communicated through Octaves to the planet Earth. Before getting too far along with Octaves, a quick definition for everyone's reference: Octaves have a wavelength, a lifespan, and an electrical voltage. Think of octaves as the basis for the message to be sent. Also think of Octaves as a subset of the infamous "Electrical Universe"

hypothesis. Octaves are apparently transmitted over ‘gravity tubes’; gravity tubes act as the medium through which communication between the Super System and the System occurs. So what exactly is a “tube” and what does the “tube” do? Another bullet point section for reference (sorry) :

Tubes are a connection consisting of magnetic pulses and frequencies designed for information and gravity Hatibow mentions that the Solar System is not kept in place through gravity alone, but through tube connections between solar bodies

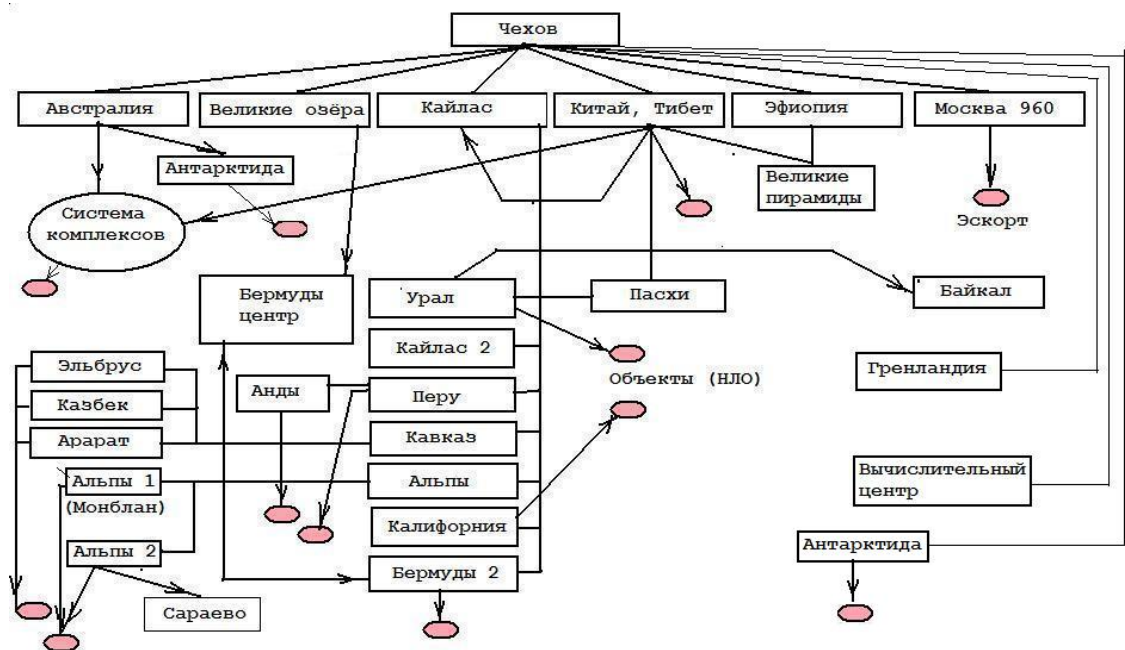

Tubes provide for the travel of UFOs, or monitoring probes

If the tube’s frequencies are not held in balance by a magnetic pulse, the tube and its associated information and gravity will scatter into space

The tube essentially is the medium, or conduit, that keeps planetary bodies in place, allows UFOs to travel, and transmits/receives information. **If one were to buy into the whole Hatibow and the Spider Universe and wanted to disrupt the system, one would start with the elimination of tubes.**

God’s Receiver

At this point, Hatibow has a lot of things going on in his work. Once the Sun/Moon/Other Satellites transfer a program to Earth through Octaves, the Complexes below the Earth receive the message and disseminate it to the appropriate targets. Hatibow states that the Management System of Earth consists of some more than 2,000 Complexes, UFOs, and controls below the Earth's surface. The control is hierarchical in nature (see below) :

The main dispatch center resides in Chekhov, near Moscow, and is the main control center, and dictates the information/data to other complexes. Depending on where the program is destined to arrive, the message is fed to one or more of the following nine parent

complexes:

1. Australia – Maintains and produces changes required of the Earth's topography
2. Great Lakes – Coordinates and controls all 7909 UFOs on the planet
3. Kailash – Main control system of the “Program” of the atmosphere and genotypes of the world
4. China/Tibet – Main set of controls in the world, and sets standards for all “facilities” (not sure what is or means)
5. Ethiopia – Main control center to ensure that “tubes” or communication stay open with the satellites of planets
6. Moscow – The main UFO on Earth – all the matrices of brains 42, 44, and 46 are stored here
7. Greenland – Manages the brain of the atmosphere/weather
8. Ireland – The computing center of the System
9. Antarctica – synchronizes the shift from Winter to Summer

Each main complex consists of pyramid(s) and floating pyramids below ground. I believe the majority of the complexes were completed at the time of Earth's construction.

Now that we have completion of the message sent and received from some far flung solar body to the appropriate complex beneath the planet Earth, what is the next step? What if the lunatics on the Moon want to create mosquitoes in Moscow? What if the inhabitants of the Sur want to create a new desert in South America? How does that program play out and materialize?

Things get a bit tricky here, but I believe the notion of the Subsystem comes into play at this point. Let's return to the discussion of octaves at this point in time. Let's assume that the standard model of matter transformation is as such :

Atomic structures -> matter -> liquid – > gas -> unorganized plasma

Atoms form matter. In turn, the atoms can be excited more and more and create various levels of matter in the form of liquid, gas, and plasma. Yet Hatibow argues this is not the case; we return again to the previously mentioned transition and creation of mass :

Strictly organized plasma -> material body -> liquid -> gas

Essential to this equation is the influence of octaves on plasma. There are essentially 512 octaves available to the Complexes of Earth that can be combined in any number of permutations. As Crrow777 has mentioned on a number of interviews, the base Octaves include : DO RE MI FA SOL LA SI NA. Hatibow goes on to state that each Octave can be “crushed 8 times”, then portioned 8 times. If I’m reading that correctly, that means there is an array that includes: DO1.0, DO1.1 ... DO2.2 ... SOL3.5 ... SI7.7 ... NA8.8. Hence, $8 \times 8 \times 8$ equals 512. To check this number 512, I searched Hatibow’s work for any reference regarding 512 octaves. I’ve listed a few below for reference:

512 interactions within the Electro-Magneto-Gravity spectrum

The planet Earth has a base of 512 octaves

The living cell – the highest achievement of the cosmic mind, combines the interaction of octaves from 12 to 512

Each Octave can be combined in any number of ways to create a string of octaves sequence; the sequence then carries with it a unique charge. Organized plasma then “materializes” based on the octave string that charges/energizes the plasma and is given a “Neinertsionnaya” weight. If the charge on plasma is

less than 64 octaves, matter is formed. If the charge on plasma is greater than 64 octaves (up to 512 octaves). neinertsionnaya mass is quantitized, wherein there is no frequency gravity. All biostructures, including human beings, are composed of a set of octaves from 16 to 128. Hatibow includes a fantastic table referencing Octaves and their corresponding impact on the organized plasma (see below) :

Octave

128 The clock interval. Sets the Sun, taken for the speed of light

78 – 126 Control systems, storage and humanoids
“barabashek” – ie ghosts, goblins, mothman, cryptids
(he doesn’t actually state mothman or cryptids, but checking to see if you are still with me on all of this)

74 – 76 Monitoring systems of all insects

72 The brain is the “golden million” genotype 461

68 – 70 The brain is the “golden billion” genotypes 441, 442

66 The brain is the rest of the world population, the genotypes of 421, 422, 423

64 Upper Octave material structures

62 Materials Management structures in the transmutation

40 – 60 Energy Corridor (Tesla worked with 60 octave)

34 – 38 Corridors “0 transitions” after death

30 – 32 Complex mixtures (such as oil)

24 – 28 Water

16 – 22 Gas

Essentially, anything can be created from strictly organized plasma through the use of octaves that originate from the Sun, the Moon, and then the Land Management System, or Complexes on or below the Earth's surface. The table above is just a tip of the iceberg when it comes to octaves. I hope to follow up with a better summarized post regarding octaves in the future.

God's Feedback

As with any system of communication, there needs to be feedback to the source/original sender of the system in order to proceed. Let's pretend that the Moon and the Sun dictated, for whatever reason, a drought in Midwest USA. Yet suddenly, it is raining in Kansas. What happens next? How can our Hatibow's God respond? What if the brain of Genotype 461 is perceiving conflict with another routine placed on Earth? How can Hatibow's God modify behavior on planet Earth?

We move on to the feedback loop. UFOs are an integral part of the feedback process. UFOs monitor atmospher-

ic and maritime conditions (more on this in my next post). Biostructural brain feedback also provides feedback to the complexes on Earth. All experiences that you and I see, smell, hear, and touch everyday are feedback to the appropriate Complex. If something is contradictory to the Program, feedback is funneled to the appropriate complex(ex) and communicated back to the Moon or other planetary Satellite. The error can be assessed, analyzed, and then modified for communication back to Earth at some current or future point in time.

At least this is the best that I can ascertain...

Two Examples of the Super System, System, and Subsystem in Action

I am going to attempt to provide two examples of the Super System -> System -> Subsystem, as I have always learned best through example. I'm going to extrapolate some points in each example as best as I can given the amount of detail in Hatibow's information and the uncertainty I have regarding specific pieces of the hypothesis. And, I am going to use the dreaded bullet point format again (sorry, last two, I promise!). Is this 100% spot on? Of course not, but it is my best guess.

A) **Drought in California**

Our Spider ruler's have decided that the strawberry yield in California is not to be beneficial in 2015. A program is created that states : California strawberry yield to be statistically significantly less than California strawberry yield in 2014. How would this program be executed?

The Lunatics on the Moon decide that California strawberry yield in 2015 to be less than yield in 2014.

After the spring equinox, the Moon transmits, through its tube to Earth, a command to trigger less rain in California

The data string goes from Moon -> Chekhov -> Greenland

Greenland then transmits octaves into the atmosphere that reduces the variables leading to a higher percentage of rain clouds

The octaves charge highly organized plasma in the atmosphere, and through specific charges, reduced the likelihood of rain storms produced over California

A random rainstorm does make its way to California, UFO monitors will take note

UFOs will communicate program error information to Greenland, wherein Greenland adjusts program to original Luna program

Future rainstorms prevented; 2015 strawberry yield decimated

B) Destruction of the Polar Caps

The planet Sur 4 has determined that the Earth's ice caps need to go. This year coincides with the window of opportunity between Sur and the Moon.

Sur transmits information to the Moon

The Lunatics on the Moon transmit through its tube with Earth the new program immediately after the spring equinox

The data string goes from Sur -> Moon -> Chechov -> Australia

Australia then communicates with the UFO complex in

the Great Lakes i. The Great Lakes complex then issues orders to UFOs to melt ice caps (again, more on that next post) Australia issues communication to Greenland Greenland issues octaves to incur temperate warmth over the ice caps

Again, the base plan is executed by the Moon, and the subroutines on Earth take care of the intent of the base plan.

Please remember, the above two examples are purely speculation. I am in no way, shape, or form indicating this is 100% reality. Yet I am not dismissive of this hierarchy completely.

Conclusion

Outside of this one being exhaustive to read through and to complete, where does all of this information leave us? Reading through most of his material published online, one is left with a desire to have access to more of Hatibow's documents. Quite a few times, in the papers published, there is a reference to other documents that are not on the Web. I probably am only reading 15-20% of his complete work. What exactly is the complete picture? Unless someone is holding back

on his work, I'm not sure anyone will ever know.

At the end of all of this analysis, does any of this mean anything? Is there truly a System of Land Management in place to keep our Earth and our humanoid bodies and brains in place? Was Hatibow a huge Truman Show fan, on acid during a Bowie 70's concert, criticizing post – Soviet Russia and the oligarchs through the use of science fiction, or is Hatibow passing off to all of us the true keys to the universe and to our existence? Is Hatibow criticizing our current state of the planet through fiction, much like many writers have and will continue to? I have no idea; but the stuff is fun to sift through, and like any good puzzle, takes time, energy and patience to piece together.

What do you think? Am I way off on this? Am I partially reading his material correctly? Are my conclusions off? Have I gone whackadoodle? There is so much math and other points of interest I've passed on in order to attempt to put a high level summary together. I'm curious if anyone else out there is reading through the Hatibow links and is attempting to piece this information together. If you are, I'd love hear from you, compare notes, and share thoughts.

Next up, Hatibow, Spiders, and the UFOnaughts. I plan

to work through Genotypes, Octaves, and more as time goes on. If there are any requests out there, please let me know!

Who is Hatibow, and What Has He Done with Our Beloved Moon?

sagesigma.blogspot.com/2015/04/who-is-hatibow-and-what-has-he-done.html

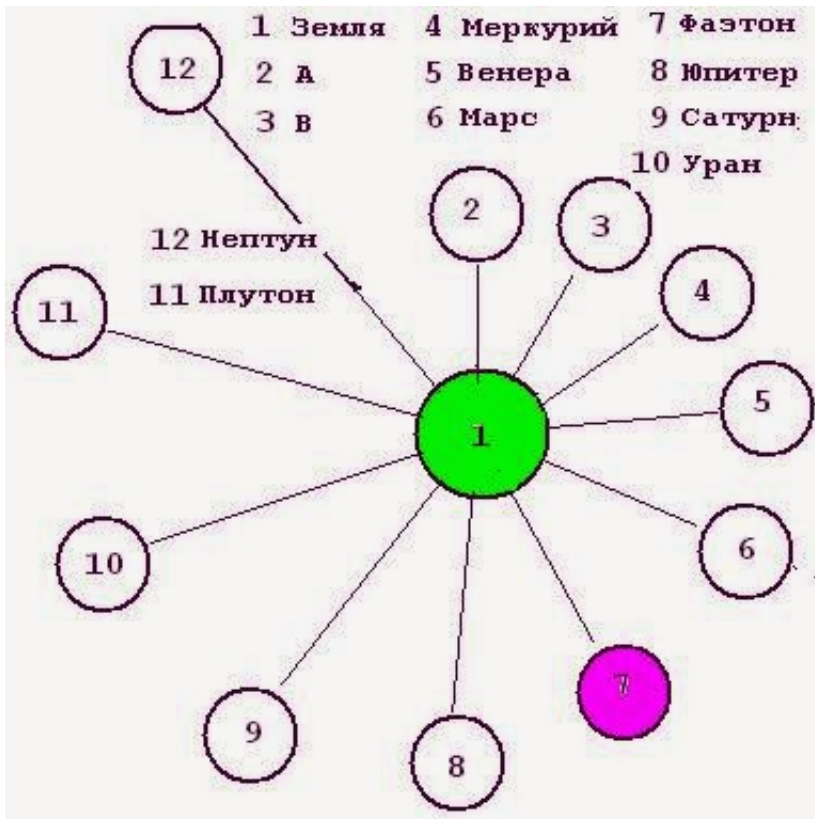

Well, as some of you are likely aware, there is currently a new phenomenon on the fringes of the internet involved with our closest neighbor in outer space. The phenomenon has been deemed by one researcher by the name of Crrow777 as the “lunar wave”.

What is the lunar wave? From what I can tell from YouTube videos, the lunar wave is a ripple that moves across the lunar surface. Imagine a “momentary blip” on some type of projected image that covers the surface of the moon. Crazy, right?

The premise that Crrow has apparently stumbled upon (and other researchers online who point telescopic video cameras at the moon during evenings) is that there is a

“tonal/octave” system in place on the moon that prevents us from seeing what is actually on the surface of the moon that faces Earth. In other words, a type of frequency that has kept the masses on this planet from learning the true nature of our reality. In cinematic metaphors, the moon is truly the moon featured in the “Truman Show.” Crrow and others have caught glimpses of this moon facade with their skywatching endeavors and posted findings online (please take the time to check out some of his videos). I have no idea if the videos are faked or genuine, but they are fascinating to watch.

Crrow’s hypothesizing and commentaries online are always entertaining ; however, where the story truly gets interesting is Crrow’s discovery of an alleged Soviet/Russian scientist by the name of Khatib Alexander who had posted similar research through 2011. Khatib Alexander, or Hatibow per the email listed, has numerous articles published online and converted to english courtesy of Google Translate. Friends, now is the time to head down into the rabbit hole of reality.

(😊 Yes, but I can 😊)

1. Earth
2. A
3. B
4. Mercury
5. Venus
6. Mars
7. Phaeton
8. Jupiter
9. Saturn
10. Uranus
11. Pluto
12. Neptune

The research is difficult to read, but a quick overview of what is going on his research :

There existed a time in humanity's history where the current moon did not exist In 18337 BC, a convoy of planets infected our solar system (or created our solar system) The convoy of planets contained a race of alien beings from the Sur 4 star of the big dipper Earth, having resources and being hospitable, was not able to defend itself from the alien race

The alien race is Spider like in nature; the Spider race was called "Atlanta" and essentially placed their brains into human bodies The Sun and Moon then are used to create cycles or frequencies of the Super System, Systems and Sub Systems that dictate life on this planet UFO naughts are terrestrial in nature and guardians of the these systems of control Different genotypes of humanity exist, and a specific genotype still carries with it the spider brain

That's about the extent of what I've gathered thus far. As to what is going on, I have absolutely no idea. Hatibow could be a legitimate Soviet researcher exposing truths regarding reality, or he could be a Russian sci fi writer, or this could be some type of governmental disinformation process, or who knows what else. Unfortunately, there isn't much info regarding Hatibow, and he allegedly

passed away in 2011. So the speculation will likely always be there.

So, to keep this blog going, I'm going to attempt to wade through his research still posted on line in an attempt to make sense of it all. I hope to be able to publish findings as I go along for everyone's review, critique, and comments.

For everyone's info, to date, you can check out Crrow777's YouTube channel. Crrow has also done two excellent interviews with Greg Carlwood on "The Higher Side Chats" podcast, as well a great interview on the Grimerica podcast. As for Hatibow's research online, here is a link :

[translate.google.com/translate?
hl=en&sl=ru&u=http://lit.lib.ru/h/hatybow_a_m/lunak.shtml&prev=search](http://translate.google.com/translate?hl=en&sl=ru&u=http://lit.lib.ru/h/hatybow_a_m/lunak.shtml&prev=search)

So with the blood moon approaching on Easter weekend, keep your eyes to the sky and wonder what is ultimately going on around us. Good luck !

Please, go to sagesigma.blogspot.com/ for further reading.
